

cirka cph's B Corp package

At cirka cph, we guide companies through the B Corp certification process end-to-end: from the initial diagnosis and action planning to final certification. With certified B Leaders in-house, we structure the process as a clear, value-creating initiative, allowing your team to stay focused on core business operations.

1. Prepare

We gather the relevant information, analyze it, and help you complete the B Impact Self-Assessment. Through this process we can quickly **evaluate your current performance** on the Foundation Requirements and Impact Topics.

2. Certify

We work with our clients and maximize their likelihood to obtain the **B Corp certification** on the latest V2.1 Standards. This includes support in the implementation of the improvements all the way to submission.

3. Sustain

We aim at supporting and preparing our clients for the **continuous improvement over time**. Moving to deeper implementation and higher ambition and maturity in the Years 3 and 5.

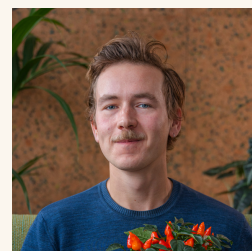

What is in it for you?

- **Focus your internal resources where they matter most:** we manage the process end-to-end, allowing your team to stay focused on core business priorities while contributing only where needed.
- **Accelerate time to certification:** with a clear roadmap and prioritization, we help you avoid bottlenecks and move efficiently from assessment to verification.
- **Translate complexity into action:** we turn complex requirements into clear, actionable steps, making it easy for your teams to implement changes with confidence.

About cirka cph

We are here to help our clients **make sustainability common sense** - something they feel and live by. We are a handful of passionate advisors who breathe life into down-to-earth initiatives based on our clients' strengths.
